

Technical Report Writing Course

Abelard Consulting is of the view that giving participants in a training course just the presentation slides to take away with them does not provide them with the best opportunity to reinforce their learning once they are back in the workplace. A slide can be meaningless when divorced from the context set by the facilitator during training. To maximise the opportunity for post-training reinforcement, Abelard Consulting provides each participant with a guide that doubles as a textbook. All the topics covered in the course are treated at length in the guide, but the guide also includes many other topics (all relevant to language and communication). Thus the guide can be used both to reinforce what participants learn during the course and to provide an opportunity, through self-paced study, to build on that learning.

The table of contents from the guide is reproduced below.

For more information about this course, call 1800 601 116 (a free call from within Australia) or send an email to courses@abelard.com.au.

Contents

| | | |
|---|--------------------|---|
| 1 | Introduction | 8 |
| | About the course | 8 |
| | Course objectives | 8 |
| | Ten basic concepts | 9 |

Part A: Language

| | | |
|---|--|----|
| 2 | General Principles of Good Technical Writing | 15 |
| | Maximum communicative efficiency | 15 |
| | Clarity | 16 |
| | Ambiguity | 16 |
| | Vagueness | 19 |
| | Familiarity | 20 |
| | Familiar vocabulary | 21 |
| | Familiar meaning | 22 |
| | Familiar idioms | 23 |
| | Familiar grammar, spelling and punctuation | 24 |
| | Familiar typography | 24 |
| | Familiar numerical representation, units and symbols | 24 |
| | Economy | 25 |
| | Verbosity | 25 |
| | Redundancy | 26 |
| | Tautology | 26 |
| | Over-precision | 26 |
| | Padding | 26 |
| | Nominalisation | 27 |
| | Consistency | 27 |
| | The principle of single and distinct denotation | 28 |
| | Techniques for controlling vocabulary and styles | 28 |
| | Summary | 29 |

| | |
|---|----|
| Exercise 1 | 30 |
| Part B: Design | |
| 3 Design, styles and templates | 35 |
| Designing technical reports | 35 |
| Document design | 36 |
| Page design | 37 |
| Content design | 37 |
| Design and structure | 38 |
| Font choice: serif or sans serif? | 39 |
| Templates | 42 |
| Common styles in technical reports | 42 |
| Creating styles in Microsoft Word | 43 |
| Creating a template in Microsoft Word | 44 |
| Using styles in Microsoft Word | 44 |
| Usability | 44 |
| Being easy to find | 44 |
| Being easy to understand | 45 |
| Being easy to apply | 45 |
| Part C: Structure | |
| 4 Technical Reports: Structures and Content | 49 |
| Introduction | 49 |
| Classifying reports | 50 |
| Classifying by purpose | 50 |
| Classifying by structure | 51 |
| Sample reports | 52 |
| Simple structure: a field report | 52 |
| Narrative structure: a laboratory report | 52 |
| Expository structure: a feasibility report | 53 |
| Sections in a typical technical report | 54 |
| Title page | 55 |
| Document control and signoff | 56 |
| Abstract and keywords | 56 |
| Executive summary | 58 |
| Contents | 59 |
| Figures and tables | 59 |
| Shortened forms | 60 |
| Glossary | 60 |
| Introduction | 61 |
| Body: expository reports | 62 |
| Body: narrative reports | 63 |
| Conclusion | 66 |
| Acknowledgements | 66 |
| Appendixes | 67 |
| Endnotes | 67 |
| References | 67 |
| Index | 67 |

| | |
|--|----|
| Citation systems and styles | 67 |
| The author–date system | 68 |
| Vancouver system | 69 |
| Documentary-note system | 70 |
| Bibliographies and reference lists | 70 |
| Style guidelines: author–date and documentary-note | 70 |
| Style guidelines: Vancouver system | 73 |
| Citation–name system | 74 |
| Technical proposals | 74 |
| Introduction | 75 |
| Current situation | 75 |
| Plan or solution | 76 |
| Qualifications or credentials | 76 |
| Costs and benefits | 76 |
| Conclusion | 76 |
| White papers | 76 |
| Common problems in white papers | 77 |
| Responding to requests for tender (RFTs) | 77 |
| Ten common reasons why tender proposals fail | 79 |
| Visuals | 79 |
| When to use tables | 80 |
| Table structure | 80 |
| Types of figures | 81 |
| Figure structure | 83 |

Part D: Process

| | |
|---|------------|
| 5 Getting Started: Strategies, Tips and Tricks | 87 |
| Objectives | 87 |
| The typical writing process | 87 |
| Research | 88 |
| Planning | 88 |
| Ingredients | 89 |
| Audience analysis | 90 |
| Gathering your thoughts | 90 |
| Tackling the first draft | 91 |
| Overcoming writer’s block | 92 |
| Project journal | 92 |
| Tips from ancient Greek philosophy | 93 |
| Edward Albee technique | 95 |
| Brainstorming | 96 |
| Mind mapping | 96 |
| Outlining | 98 |
| 6 Reviewing | 100 |
| What is the purpose of reviewing? | 100 |
| Principal tasks of document reviewing | 101 |
| Qualities of a good reviewer | 102 |
| When you are the reviewer | 104 |

| | | |
|------------------------------|--|------------|
| 7 | Copy-editing | 106 |
| | What is the goal of copy-editing? | 106 |
| | Language issues | 106 |
| | Readability issues | 106 |
| | Some considerations | 107 |
| | Conceptually fractured sentences | 107 |
| | Overly long sentences | 107 |
| | Noun clustering | 110 |
| 8 | Structural editing | 112 |
| | What is the goal of structural editing? | 112 |
| | Structure issues | 112 |
| | Design issues | 112 |
| | Usability issues | 113 |
| | Logic issues | 113 |
| | Tables and figures | 114 |
| | Some considerations | 114 |
| | Sequencing | 114 |
| | Balance | 115 |
| | Relevance | 115 |
| | Omissions | 116 |
| | Repetitions | 117 |
| | Cohesion | 117 |
| | Inconsistent styles | 117 |
| | Tabular information: horizontal or vertical? | 118 |
| | Poor call-outs | 118 |
| | Figures that don't support the text | 119 |
| | Figures that could easily mislead | 119 |
| | Reasoning and logic | 121 |
| | Reasoning | 121 |
| | Common fallacies | 124 |
| 9 | Technical review | 130 |
| | What is the goal of a technical review? | 130 |
| | Technical reviewers | 130 |
| | Some considerations | 131 |
| | Internal contradictions | 131 |
| | Plagiarism and fabrication | 131 |
| | Sloppy citing and referencing | 131 |
| 10 | Pre-publication tasks | 133 |
| | What is the goal of a pre-publication check? | 133 |
| | Proof-reading | 133 |
| | Pagination | 134 |
| | Automation checks | 135 |
| Part E: Consolidation | | |
| | Exercise 2 | 139 |
| | Exercise 3 | 140 |
| | Exercise 4 | 142 |

Part F: Back matter

| | | |
|---|--|-----|
| A | Answers to Exercises | 147 |
| | Exercise 1 | 147 |
| | Exercise 2 | 148 |
| | Exercise 3 | 148 |
| | Exercise 4 | 149 |
| B | Bloated Language | 152 |
| C | Numbers, Symbols & Measurements | 155 |
| | Words or numerals? | 155 |
| | Fractions | 156 |
| | Percentages | 156 |
| | Dates and time | 157 |
| | Digit separators | 158 |
| | Numbers in equations | 160 |
| | Types of symbols | 160 |
| | Quantity symbols: variables and physical constants | 160 |
| | Unit symbols: symbols of measurement | 161 |
| | Descriptive symbols | 163 |
| D | Entering Uncommon Characters | 164 |
| | How do I find the code for a Unicode character? | 165 |
| | Entering a Unicode character | 166 |
| | What about the web? | 168 |
| E | Bibliography | 169 |
| | Index | 170 |
