

Technical Writing Course

Abelard Consulting is of the view that giving participants in a training course just the presentation slides to take away with them does not provide them with the best opportunity to reinforce their learning once they are back in the workplace. A slide can be meaningless when divorced from the context set by the facilitator during training. To maximise the opportunity for post-training reinforcement, Abelard Consulting provides each participant with a guide that doubles as a textbook. All the topics covered in the course are treated at length in the guide, but the guide also includes many other topics (all relevant to language and communication). Thus the guide can be used both to reinforce what participants learn during the course and to provide an opportunity, through self-paced study, to build on that learning.

Participants in Abelard Consulting's two-day public technical writing course receive a 363-page reference book. This book—which is fully indexed—covers in detail all the topics covered in the course and substantially more. To give you an idea of the topics covered in the course, the contents pages of the reference book are reproduced below. (Participants in our corporate courses—those provided in-house to a single client—receive a slightly modified book of approximately 325 pages.)

For more information about this course, call 1800 601 116 (a free call from within Australia) or send an email to courses@abelard.com.au.

Contents

1	Introduction	11
	About the course	11
	Course objectives	11
	What is technical writing?	12
	Prescriptivist view	12
	Descriptivist view	12
	The long history of technical writing	13
	New name for an old profession	14
	What do technical writers produce nowadays?	14
	Why <i>good</i> technical writing matters	14
	Professional ethics	14
	Ethics pure and simple	14
	The law	15
	But no one reads user documentation, right?	16
	The value the profession adds: commercial benefits	16
2	General Principles of Good Technical Writing	18
	Objectives	18
	Maximum communicative efficiency	18
	Five essential attributes of good factual writing	19
	Clarity	19
	Ambiguity	20
	Vagueness	25
	Familiarity	27
	Familiar vocabulary	27
	Familiar meaning	30

Familiar idioms	30
Familiar grammar, spelling and punctuation	31
Familiar signs and symbols	32
Familiar numerical representation, units and symbols	32
Economy	33
Verbosity	33
Triviality	33
Redundancy	34
Tautology	34
Over-precision	34
Padding	35
Neutrality	35
Techniques for avoiding sexism	37
Consistency	38
The principle of single and distinct denotation	38
Techniques for controlling vocabulary and styles	39
But what about correct writing?	39
Putting practices and conventions into perspective	41
The primacy of communicative efficiency	42
Summary	42
Exercise 1	44
3 The Language of Language	46
The importance of knowing the language of language	46
The parts of speech	47
Nouns	47
Pronouns	50
Verbs	53
Adjectives	57
Adverbs	59
Conjunctions	60
Prepositions	61
Determiners	61
Interjections	62
Person	63
Structural elements	63
Phrase	64
Clause	65
Sentence	66
Paragraphs	67
Exercise 2	73
Post-break activities: Day 1	75
4 The Process of Writing: Strategies, Tips and Tricks	76
Objectives	76
The typical writing process	76
Research	77
Planning	77
Ingredients	78
Audience analysis	79

Choosing the type of deliverable	81
Estimating	83
Design issues	84
Document design	84
Page design	85
Content design	86
Serif or sans serif?	88
Online or print?	90
Economical fonts	91
Templates	92
Common styles in technical reports	93
Creating styles in Microsoft Word	94
Creating a template in Microsoft Word	94
Using styles in Microsoft Word	95
The first draft	95
Getting started: Overcoming writer's block	97
Project journal	98
Tips from ancient Greek philosophy	98
Edward Albee technique	101
Mind mapping	101
Outlining	103
Reviewing	104
Peer review	104
Technical review	106
Qualities of a good reviewer	106
When you are the reviewer	108
Pre-publication tasks	108
5 Writing Step-by-Step Procedures	111
Objectives	111
Definition	111
Warm-up exercise	111
Anatomy of a procedure	113
Title	113
Overview	113
Prerequisites	113
Risk statements	114
Duration	114
References	114
Steps	114
Related tasks	115
Style	115
Title	115
Steps	116
Specifying risks	117
Where to place risk messages	117
How long should a procedure be?	118
The so-called 7 ± 2 rule	119
Common problems in procedure writing	119
Branching and chunking	125
Branching	125
Chunking	125
Visualising tasks and processes	127

Exercise 3	129
6 Aspects of Grammar	133
Objectives	133
Grammar: what is it?	133
Some old rules not worth worrying about	134
Splitting infinitives	134
Stranded prepositions	134
Beginning a sentence with <i>and</i> or <i>but</i>	135
Revisiting <i>be</i>	136
Common problems of grammar	137
Verb–subject agreement	137
Interrogatives	147
Subject–pronoun agreement	147
Relative clauses	148
Comparatives and superlatives	151
Exercise 4	154
7 Obstacles to Readability	155
Objectives	155
Mechanics versus style	155
The roots of good style	156
Common problems	157
Conceptually fractured sentences	157
Sentence: overly long and poorly varied	157
Overly dense sentences	161
Misplaced jargon	162
Overly pre-modified nouns	163
Noun clustering	165
Nominalisation	166
Voice: active or passive?	167
Impersonal constructions	170
Register	171
Readability formulas	172
Flesch Reading Ease Formula (FREF)	172
Readability statistics and passive sentences	174
Exercise 5	176
Post-break activities: Day 2	178
8 Troublesome Words	179
Objective	179
Words to watch	179
9 Punctuation Refresher	191
Objectives	191
Terminology	191
The purpose of punctuation	192
Grammatical purpose	192
Emphatic purpose	192

Is punctuation important?	192
Vital punctuation	192
Discretionary punctuation	193
Fads worth forgetting	194
Descriptor fragments in parentheses or between dashes	194
Colons introducing a run-on list	195
Over-capitalisation	196
Lazy quotes	196
Solidus (/): a mark to be mostly avoided	197
Exclamation marks (!)	198
Singular–plural composites	199
Where punctuation is vital to meaning	199
Apostrophes	199
En dashes	203
Marking off parenthetical material	205
Dashes and similar characters: a summary	208
Commas in general	208
Serial commas: sometimes they are important	212
Hyphens and compound adjectives	213
Semicolons	215
Colons	217
Other punctuation marks	219
Brackets	219
Ellipsis (aka ellipsis points)	221
Quotation marks (aka inverted commas)	222
Exercise 6	228
10 Reports: Structure, Content & Strategies	229
Objectives	229
Introduction	229
Classifying reports	230
Classifying by purpose	230
Classifying by structure	231
Sample reports	232
Simple structure: a field report	232
Narrative structure: a laboratory report	232
Expository structure: a feasibility report	233
Sections in a typical narrative or expository report	234
Title page	235
Document control and signoff	236
Abstract and keywords	237
Executive summary	239
Contents	240
Lists of figures and tables	240
List of shortened forms	240
Glossary	241
Introduction	241
Body: expository reports	243
Body: narrative reports	243
Conclusion	246
Acknowledgements	247
Appendixes	247
Endnotes	247

References	248
Index	248
Citation systems and styles	249
The author–date system	249
Vancouver system	250
Documentary-note system	251
Bibliographies and reference lists	251
Citation and footnotes	251
Style guidelines: author–date and documentary note systems	252
Style guidelines: Vancouver system	255
Citation–name system	256
Technical proposals	256
Introduction	257
Current situation	257
Plan or solution	257
Qualifications or credentials	257
Costs and benefits	258
Conclusion	258
White papers	258
Common problems in white papers	258
Responding to requests for tender (RFTs)	259
Ten common reasons why tender proposals fail	260
Visuals	261
When to use tables	262
Table structure	262
Types of figures	263
Figure structure	265
Common problems in reports	265
Structural weaknesses	266
Poor font choice	269
Unhelpful table settings	269
Poor call-outs	270
Inconsistent styles	271
Pagination issues	271
Internal contradictions	271
Figures that don't support the text	272
Figures that could easily mislead	272
Plagiarism and fabrication	273
Sloppy citing and referencing	274
Exercise 7	275
11 Reports: Reasoning & Logic	278
Objectives	278
Introduction	278
Innate weaknesses in human reasoning	279
Reasoning	279
Logical reasoning	280
Sound reasoning	281
Junk reasoning	282
Common fallacies	283
Petitio principii	283
Affirming the consequent	284

Denying the antecedent	285
Post hoc ergo propter hoc	286
Argumentum ad hominem	287
Genetic fallacy	287
Ignoratio elenchi	287
Straw-man fallacy	287
Exercise 8	289
12 New Practices in Technical Writing	291
Objectives	291
Adobe Acrobat 3D	291
Single-sourcing	291
Content management systems	292
XML	292
Structured authoring	292
Collaborative authoring: the rise of wikis	294
13 Breaking into Technical Writing	297
Objectives	297
Why work as a technical writer?	297
Finding a job as a technical writer	297
Writing a CV	298
What pay can I expect?	298
Pros of being a contractor	299
Cons of being a contractor	299
A Answers to Exercises	303
Exercise 1	303
Exercise 2	304
Exercise 3	306
Exercise 4	309
Exercise 5	310
Exercise 6	311
Exercise 7	312
Exercise 8	314
Other exercises	315
B Bloated Language	320
C Numbers, Symbols & Measurements	323
Words or numerals?	323
Fractions	324
Percentages	324
Dates and time	324
Digit separators	326
Numbers in equations	328
Types of symbols	328
Quantity symbols: variables and physical constants	328
Unit symbols: symbols of measurement	329
Descriptive symbols	331

D	Methods of Controlling Vocabulary	332
	Simplified English	332
	Subject-specific thesauri	333
	Project journals	335
	Editing style sheets	337
	Style guides	339
E	Entering Uncommon Characters	340
	How do I find the code for a Unicode character?	341
	Entering a Unicode character	342
	Sample characters	343
	What about the web?	344
F	Variants of the English Language	345
	American English	345
	British English	347
	Other variations	347
G	Editors' Checklists	348
	Copy-editing checklist	348
	Structural editing checklist	349
	Content edit checklist	350
	Proof-reading checklist	351
H	Common Proof-reading Marks	353
I	Sample Estimating Algorithms	356
J	Writing Emails	358
	Adopting the right register (aka tone)	358
	Common structures	359
	The Issue–Description–Action (IDA) approach	359
	The MADE approach	360
	The Executive Summary approach	361
	Writing tips	362
	Attitudinal writing	364
K	Professional Societies & Other Resources	365
	Professional societies	365
	Local	365
	Overseas	365
	Online discussion forums	366
L	Bibliography	367
	Index	369
