

Technical Writing Course

Participants in Abelard Consulting's two-day technical writing course receive a 315-page reference book. This book—which is fully indexed—covers in detail all the topics covered in the course and substantially more. To give you an idea of the topics covered in the course, the contents pages of the reference book are reproduced below.

The course was designed by, and is presented by, Dr Geoffrey Marnell. Geoffrey teaches *Technical Writing and Editing* in the English Department at the University of Melbourne. He has more than 20 years experience as a technical writer, recruiter of technical writers, documentation consultant, documentation project manager and educator.

Contents

1	Introduction	10
	About the course	10
	Course objectives	10
	What is technical writing?	11
	Prescriptivist view	11
	Descriptivist view	11
	The long history of technical writing	12
	New name for an old profession	13
	What do technical writers produce nowadays?	13
	Why <i>good</i> technical writing matters	13
	Professional ethics	13
	Ethics pure and simple	13
	The law	14
	But no one reads user documentation, right?	15
	The value the profession adds: commercial benefits	15
2	General Principles of Good Factual Writing	17
	Objectives	17
	Maximum communicative efficiency	17
	Five essential attributes of good factual writing	18
	Clarity	18
	Ambiguity	18
	Vagueness	23
	Familiarity	25
	Familiar vocabulary	26
	Familiar meaning	27
	Familiar idioms	27
	Familiar spelling and punctuation	28
	Familiar typography	28
	Familiar numerical representation, units and symbols	29
	Economy	30
	Verbosity	30

Triviality	31
Redundancy	31
Tautology	31
Over-precision	32
Neutrality	33
Techniques for avoiding sexism	34
Consistency	35
The principle of single and distinct denotation	36
Techniques for controlling vocabulary and styles	36
But what about correct writing?	37
Putting practices and conventions into perspective	41
The primacy of communicative efficiency	41
Exercise 1	43
3 Design and Usability	45
Objectives	45
Introduction	45
Templates	46
Main aspects of design in technical writing	46
Content design	46
Designing for maximum comprehension	46
Online or print?	50
Designing for structure	52
Usability	54
Being easy to find	54
Being easy to understand	55
Being easy to apply	55
Post-break activity 1	57
4 The Language of Language	58
Objectives	58
The importance of knowing the vocabulary of language	58
The parts of speech	59
Nouns	59
Pronouns	62
Verbs	65
Adjectives	69
Adverbs	71
Conjunctions	72
Prepositions	73
Articles	74
Interjections	74
Recap	74
Person	75
Structural elements	75
Phrase	76
Clause	76
Sentence	78
Paragraphs	80
Exercise 2	86

5	Documentation Development Process	88
	Objectives	88
	The typical process	88
	Sources of information	89
	Documentation plan	89
	Ingredients	90
	Audience analysis	91
	Choosing the type of deliverable	93
	Estimating	95
	Drafting	96
	Reviewing	97
	Peer review	97
	Technical review	98
	Proof-reading	99
	Pre-publication tasks	99
	Final pre-press tasks	100
	Checking printer's proof	100
6	Writing Procedures	102
	Objectives	102
	Definition	102
	Warm-up exercise	102
	Anatomy of a procedure	104
	Title	104
	Overview	104
	Prerequisites	104
	Cautions & warnings	104
	Preamble	104
	Steps	105
	Related tasks	106
	Style	106
	Title	106
	Steps	108
	Specifying risks	108
	Where to place risk messages	109
	Visuals	110
	Types of visuals	110
	Conventions for visuals	111
	How long should a procedure be?	112
	Common problems in procedure writing	112
	Branching and chunking	117
	Branching	117
	Chunking	117
	Visualising tasks and processes	119
	Exercise 3	122
7	Aspects of Grammar	124
	Objectives	124
	Grammar: what is it?	124
	Some old rules not worth worrying about	125
	Splitting infinitives	125

Stranded prepositions	125
Beginning a sentence with <i>and</i> or <i>but</i>	126
Revisiting <i>be</i>	127
Common problems of grammar	127
Verb–subject agreement	128
Subject–Pronoun Agreement	139
Relative clauses	139
Comparatives and superlatives	142
Personal pronouns in conjunctions	144
Exercise 4	146
8 Obstacles to Readability	147
Objectives	147
The two principal elements in writing	147
The roots of good style	148
Common problems	149
Sentence length	149
Misplaced jargon	153
Overly pre-modified nouns	154
Nominalisation	157
Voice	158
Impersonal constructions	161
Register	162
Readability formulas	163
Flesch Reading Ease Formula (FREF)	163
Readability statistics and passive sentences	165
Exercise 5	167
Post-break activity 2	169
9 Troublesome Words	170
Objective	170
Words to watch	170
10 Punctuation Refresher	182
Objectives	182
Terminology	182
The purpose of punctuation	183
Grammatical purpose	183
Emphatic purpose	183
Is punctuation important?	183
Vital punctuation	183
Discretionary punctuation	184
Fads worth forgetting	185
Descriptor fragments in parentheses or between dashes	185
Colons introducing a run-on list	186
Over-capitalisation	187
Lazy quotes	187
Solidus (/): a mark to be mostly avoided	188
Exclamation marks (!)	189
Singular–plural composites	190

Where punctuation is vital to meaning	190
Apostrophes	190
Hyphens and en dashes	193
Marking off parenthetical material	196
Commas in general	198
Serial commas: sometimes they are important	203
Hyphens and compound adjectives	203
Semicolons	206
Colons	207
Other punctuation marks	210
Brackets	210
Ellipsis (aka ellipsis points)	212
Quotation marks (aka inverted commas)	213
General recommendations	217
Exercise 6	219
11 Writing Reports	221
Objectives	221
Introduction	221
Classifying reports	222
Informal reports	222
Formal reports	222
Classifying by purpose	223
Classifying by structure	223
Sample reports	224
Simple structure: a field report	225
Expository structure: a feasibility report	225
Narrative structure: a laboratory report	226
Pyramidal structure: an overlay for other report types	226
Typical components of formal reports	226
Title page	228
Document control and signoff	229
Abstract and keywords	230
Executive summary	232
Contents	233
Lists of figures and tables	233
Acknowledgements	233
Introduction	234
Body: general reports	236
Body: scientific reports	236
Conclusion	240
Appendixes	240
List of shortened forms	241
Glossary	241
Endnotes	241
References	242
Index	242
Citation systems and styles	242
The author–date system	242
Other citation systems	244
Bibliographies and reference lists	244
Citation and footnotes	244

Style guidelines	244
Getting started: overcoming writers block	248
Brainstorming	248
Mind mapping	249
Outlining	249
12 New Practices in Technical Writing	251
Objectives	251
Adobe Acrobat 3D	251
Single-sourcing	251
Content management systems	252
XML	252
Structured authoring	252
Collaborative authoring: the rise of wikis	254
13 Breaking into Technical Writing	257
Objectives	257
Why work as a technical writer?	257
Finding a job as a technical writer	258
Writing a CV	258
What pay can I expect?	259
Pros of being a contractor	259
Cons of being a contractor	260
A Answers to Exercises	263
Exercise 1	263
Exercise 2	265
Exercise 3	267
Exercise 4	269
Exercise 5	270
Exercise 6	271
Flowchart exercise	273
Decision table exercise	273
Procedure writing: warm-up exercise	274
B Bloated Language	276
C Numbers, Symbols & Measurements	279
Words or numerals?	279
Fractions	280
Percentages	280
Dates and time	281
Digit separators	282
Numbers in equations	284
Types of symbols	284
Quantity symbols: variables and physical constants	284
Unit symbols: symbols of measurement	285
Descriptive symbols	287
D Methods of Controlling Vocabulary	288
Simplified English	288
Subject-specific thesauri	289

Project journals	291
Editing style sheets	293
Style guides	295
E Entering Uncommon Characters	296
How do I find the code for a Unicode character?	297
Entering a Unicode character	298
Sample characters	298
What about the web?	299
F Variants of the English Language	301
American English	301
British English	303
G Sample Estimating Algorithms	304
H Common Proof-reading Marks	306
I Professional Societies & Other Resources	309
Professional societies	309
Local	309
Overseas	309
Online discussion forums	310
J Bibliography	311
Index	312
